ENERGY STORAGE**

---

# ENERGY STORAGE COALITION

The Energy Storage Coalition is an organisation aimed at promoting the benefits of energy storage and advocate for a more favourable legal, financial and political framework for its deployment.

The Coalition aims at accelerating the decarbonisation of the European energy system by increasing the deployment of sustainable and clean energy storage solutions to support renewables.

The Energy Storage Coalition is constituted of four key clean energy actors:

Breakthrough Energy, EASE (the European Association for the Storage of Energy), SolarPower Europe, WindEurope.

# ENERGY STORAGE to achieve

# ENERGY STORAGE to achieve

## CLIMATE TARGETS

Energy Storage reduces reliance on polluting generation during demand peaks

More  
Renewable  
Energy Sources  
(RES)

Energy Storage  
maximises the use  
of EU-produced renewable  
energy & decreases GHG  
emissions

# ENERGY STORAGE to increase ENERGY SECURITY

Energy Storage  
reduces energy  
imports

Energy Storage prevents renewable energy curtailment

Energy Storage maximises the uptake of renewables

# ENERGY STORAGE to reduce ENERGY BILLS

Energy Storage shields consumers from price volatility in global fossil fuel markets

**Energy Storage**  
supplies consumers with  
cheap renewable energy  
in times of high prices
